

THE INSIDE STORY

Mitsubishi Electric Expansion in Warrendale

In February 2007, Allegheny County Executive Dan Onorato announced Mitsubishi Electric Power Products Inc. would expand its operations in Warrendale and add 75 new jobs. The company added approximately 100,000 square feet of additional office, warehouse and production space at its headquarters in Thorn Hill Industrial Park.

Mitsubishi Electric Power Products supplies equipment and services for electric utility, water treatment and railroad industries, as well as uninterruptible power supplies and Diamond Vision™ stadium screens. The company expanded due to increased market demand for its existing products and a plan to sell more products offered worldwide by its parent company, Mitsubishi Electric Corporation of Japan.

Mitsubishi Electric Power Products purchased the building and land between its existing Warrendale properties for the expansion.
